Beth:

That is fine. We can certainly put this tank in totes.

We need to discuss how to handle the remainder of the acids. Leroy has a plan but I want to make sure you are in agreement with the plan and that it is the cost effective way to go. We will be sampling them the acids next week. PT1 is a dirty/oily acid while the others are pretty clean. The compatability issue in my opinion is associated with the concentration of the acid.

Also, the same situation with the Ferric Chloride (Lewis Acid). I am concerned about our progress while I am gone so Leroy and I will be discussing this tomorrow. We need you help on what to tote/drum.

Thanks

Beth:

What is the status of ST1? Did you here back from your other contacts? I think I want to try to get this going next week if we have to tote it.

I am assuming that you are talking with Leroy ont the sampling strategy for the acids and you agree.

Terry indicated that Amandeep is working to get him a work plan for the Vacuum Boxes so we can ship under the

TCEQ to Veolia beginning next week. Please ram rod this through with Amandeep so everything is ready. He should give us daily updates on status.

Thanks
